Campaign Spending: [List of Filers](#)

As a resident of Ewa Beach since 1989, I have witnessed our standard of living struggle to keep pace with all of the new development being etched on our side of the island.

The carrying capacity for our roads and schools have been exceeded. The transformation of what was once farmland into additional commercial and residential developments are having an adverse impact on our quality of life.

The two years passed so quickly. My work just begun but there is more work that remains to be done.

In order to catch up, the state has to do more than build the North-South Road and widen Ft. Weaver Road. These projects were initiated before the year 2000. Since then, the state has done little to address our transportation needs. That is why my efforts to bring us additional transportation solutions such as passenger ferry service, a new 18- mile bikeway, Ft. Weaver Widening, North-South Road, rail transit, opening up our area cane haul roads, and proceeding with the underwater tunnel study funds passed by the Legislature are needed. I am working on this initiative as an alternative route to the H-1 Freeway. This plan uses private investments which negate raising taxes.

As far as addressing overcrowding in our public schools, new classrooms are slated to be built for Campbell and Ewa Beach Elementary Schools as well as the construction of two new campuses.

Please stay with me and together we will work on improving our quality of life.
